

FUTURE BUILD

MAY 2024 | Monthly Report

This is the May report from Future Build Company, which provides a comprehensive overview of key projects from various departments. Each department has highlighted one notable project: the Architecture Department showcases an innovative design, the Interior Architecture Department presents a creative and functional interior space, the Structural Department features a significant speech at a conference, and the Mechanical Department introduces advanced building systems. This report aims to offer insights into the diverse and high-quality work being done across the company.

Architecture

Dr. Akbari's house is currently in the design phase. It is a two-story home designed in a classic style, aiming to blend traditional elements with modern functionality.

Structural Design

Dr. Ali Razavi, the Head of the Structural Department, delivered a speech at the Structural Earthquake Panel during the SEE9 Conference.

Interior Design

The new branch of Soure Mehr Bookstore is being designed at Azadi Cinema and is currently in the implementation phase.

MEP Design

The installations of the Zanbagh Tower in Za'feraniyeh have been completed, and post-implementation photography has been conducted.
